

## WARRANTY CARD

Date of issue on invoice.

Devices type: **RPTH-230 UM1BPx**

Warrantor: SANITOBİ TRADING Sp. Z o.o.

1. Responsibility under the warranty includes flaws that occurred for causes lying directly within the sold equipment. Within the terms of the warranty, the Warrantor is obliged to remove any physical flaws free of charge.
2. The Warrantor grants a warranty with free of charge service for a period of 24 months, from the date of issue of the warranty.
3. The warranty covers all elements of the delivered devices along with the equipment, except for consumables that become used during normal use.
4. Within the given warranty the Warrantor provides technical service and cannot refuse to replace a broken part with a new one, in case its repair does not guarantee proper functioning of the device.
5. In case of 3 warranty repairs of the same element, the Warrantor will be obliged to replace the repaired element with a new one, free of any flaws.
6. Reception of the device by a provider of transport services will take place within 3 business days from the date when information about a malfunction was sent by the User. The repair will take place within the next 7 business days, and in case an import of replacement parts is necessary, within 14 business days from the date the repair was reported.
7. Transport of the flawed device to the location of the Warrantor is provided by the User.
8. The Warrantor will provide full authorized warranty service of the subject of order. In case the device needs repairing, the period of warranty mentioned in points 2 and 3 becomes prolonged by the period during which the device was being repaired. In case of repair including a replacement of any parts, the warranty period for those parts is equal to the ones covered by points 2 and 3.
9. Both parties take into account the possibility that the device to be repaired is delivered by a provider of transport services, at the expense and responsibility of the User.
10. In exceptional cases, at the user's request, the guarantor can send spare parts to the user and allow him to repair himself without losing the warranty. This option is available only after sending the damaged parts back to the guarantor.

## OPERATING INSTRUCTIONS

### Mobile washbasin UM1BPx with water heater

Capacity of tanks - 15l

Supply - 230V 50Hz

Power - 3000W

Working temperature from + 3 ° C

Pump supply 12V

#### Preparing for first use

Please tighten the handles as instructed. Remove the box and tape securing the tanks.

Before turning on the appliance, fill the right tank with clean water.

Connect the basin to 230V power supply.

Then open the tap and the pump will turn on automatically.

After filling the clean water tank and inserting the pump, shake the pump to bleed air.

For model with foot switch.

When using the foot switch, the tap knob must be in the open position and set to the desired water temperature.

#### Use

In order to use water, open the tap above the chamber. In order to draw hot water

set the lever on the tap to the red field. Allow a moment to heat up. If the water is

too warm, move the tap lever towards the blue area.

The red diode on heater means it is ready for operation.

Blue diode - heating.

#### NOTE!

**Do not run the pump water in the right tank is below 5 cm !!!**

This may cause damage to the pump and heater.

Dispose of waste water according to the recommendations of the sanitary services.

If the surface is dirty, clean it with non-scratching agents.

In order for clean water in the tank not to change its properties, it is recommended to use a disinfecting

tablet water, e.g. MICROPUR. It is recommended to clean the tanks with a disinfecting agent, eg PURA

TANK, before each water change.

In case of failure, disconnect the device from the power supply and contact the service

**[service@sanitobi.com](mailto:service@sanitobi.com)** Do not try to repair it yourself.

Disconnect the device from the power supply before servicing the device.

When cleaning the surface of the device, wear rubber protective gloves
